To whom it may concern,
I have just been made aware of the attempt by the "National Association of Broadcasters" to dictate the programming provided on XM radio. I am appalled by this. While I personally don't benefit a great deal from traffic the traffic reports provided, I do take advantage of the weather related information that XM provides. XM offers programming that some of us, in more remote areas of the country don't have access to. I appreciate the programming and the reasonable charge that is charged for it. I voluntarily pay for this service, and feel is it no ones right to try to limit it in any way. Please reject on my behalf the NAB's petition #04-160.

Sincerely,

Rick Kleineck
